

Charles Yang studied computer science at the MIT AI Lab. After a few years at Yale, he now teaches linguistics, computer science, and psychology while directing the Program in Cognitive Science at the University of Pennsylvania. He works on language acquisition, variation, and change, natural language processing (NLP), and is broadly interested in the study of the mind including, more recently, numerical and conceptual development in children. He has written several books: *The Price of Linguistic Productivity: How Children Learn to Break the Rules of Language* (MIT Press 2016) won the Leonard Bloomfield Award from the Linguistic Society of America. He has received fellowships from the National Science Foundation and the John Simon Guggenheim Memorial Foundation.
